

AAGENT Smart Contract Security Assessment

AAGENT

July 30, 2026

Authored by AAGENT Security Team

Executive Summary

ALL TRACKED CODE FINDINGS VERIFIED AS RESOLVED

Assessment result

No Critical or High issue was identified. All tracked code findings have verified remediation in the current source snapshot. Mainnet activation remains subject to deployment-address, role, reserve, RPC and funded-wallet acceptance gates.

Scope

Five core contracts and six production interfaces, 3,287 production lines of Solidity, plus deployment and keeper controls.

Verification

34 Solidity files compiled; 74 chain-56 tests passed with one intentional wrong-chain case skipped by design; the chain-97 guard passed independently.
