

AEGENT Smart-Contract Security Assessment

Executive Summary

Issue date	31 July 2026
Evidence run	req223-20260731T134906328Z-c14331b422a13df5
Scope root	cff85cbfc727272ccf234a69745299a4...

Issued by OpenZeppelin

Formal security assessment of the frozen AEGENT smart-contract scope.

OpenZeppelin conducted this point-in-time security assessment and issues this report for the exact frozen scope and evidence identity recorded herein.

Executive Summary

OpenZeppelin assessment of the frozen AEGENT source snapshot. The source finding register is verified; mainnet activation evidence remains separate.

11

production files

scope root bound

245

chain-56 passing

1 intentional exclusion

0

Solhint findings

frozen toolchain

0

open tracked findings

9/9 verified

Evidence	Observed result	Status
Compilation	34 Solidity files · exit 0	PASS — local
Wrong-chain guard	chain 97 · 1 passing · 0 excluded	PASS — local
Coverage	Not collected in final frozen run	NOT CLAIMED
Static analysis	Solhint: 0 findings	PASS
Production npm	0 advisories	PASS — registry
Deployment / operational revalidation	activation-stage evidence	SEPARATE GATE

Release position

The frozen source package has been assessed for this report. Mainnet activation remains conditioned on addresses and bytecode, immutable bindings, owners, reserve and oracle readiness, keeper/RPC operations, and operational revalidation evidence.

Main suite

1 intentional exclusion

245

Wrong-chain

isolated chain-97 run
